Fax 207-636-8046

DO YOU HAVE ONE OF THE FOLLOWING LAB VALUES OR DIAGNOSIS?

Please check each box that is true, and provide a value if possible:

A1c: (must be 5.7%–6.4%)

Fasting plasma glucose: (must be 110–125 mg/dL)

2-hour (75 gm glucola) plasma glucose: (must be 140–199 mg/dL)

Prediabetes determined by clinical diagnosis of gestational diabetes (GDM) during previous pregnancy

DID YOU KNOW?

- Eating too much sugar does not cause diabetes, but being overweight is a risk factor.
- People with prediabetes may not have any symptoms.
- An estimated 88 million Americans ages 20 years and older have prediabetes.
- And... more than 8 in 10 of those 88 million have NO IDEA they're at risk.

National Institutes of Health research has shown that programs like the YMCA's Diabetes Prevention Program reduce the number of new cases of type 2 diabetes by 58% overall and by 71% in people over 60.

YMCA MEMBERSHIP NOT REQUIRED!

The Y is a leading nonprofit committed to improving the nation's health. Financial assistance is available to those who qualify. Please contact the Y for more information.

YOUR LIFE

Diabetes Prevention Program
Sanford-Springvale YMCA

Can you measure a healthy life? Sure, you can—by the cup, the ounce and the block.

If you're at risk for type 2 diabetes, you can make small, measurable changes that can reduce your risk and help you live a happier, healthier life.

CHANGE IS TOUGH—WE CAN HELP

Let's face it, if change were easy, we'd all do it. You've spent years developing habits that you can't expect to change overnight. It's tough. We can help.

The YMCA's Diabetes Prevention Program gives you the skills you need and the support you deserve to make lasting, healthy lifestyle changes.

* Asian individual(s) BMI \geq 23

** Qualified blood results in the prediabetes range are needed to confirm eligibility. Individuals who have already been diagnosed with either type 1 or type 2 diabetes do not qualify for this program.

YMCA's Diabetes Prevention Program ("YMCA's DPP") uses a CDC-approved curriculum and is part of the CDC-led National Diabetes Prevention Program. YMCA of the USA offers access to YMCA's DPP through a network of local YMCAs, and YMCA's DPP may or may not be a covered benefit under your health insurance policy, worksite wellness program, Medicare Plan, or other applicable federally funded healthcare program. To find out whether YMCA's DPP is covered under your policy and to determine any cost-sharing responsibilities, contact your insurance company, health plan administrator, wellness program sponsor, Medicare or Medicaid. Any dispute regarding coverage of YMCA's DPP should be brought to your insurance provider or benefit program administrator. Neither YMCA of the USA nor any local YMCA warrants or guarantees any specific outcome for YMCA's DPP participants with respect to diabetes prevention.

GROUP SUPPORT KEEPS YOU MOTIVATED

Everyone needs a push, a pat on the back, a helping hand sometimes. A little encouragement goes a long way when you're making big changes. As a participant in the YMCA's Diabetes Prevention Program, you will take 25 classes over the course of a year surrounded by a group of supportive people with common goals who care about your well-being.

As a participant, you'll enjoy:

- A safe space where you can feel comfortable sharing and learning in private.
- Making new friends. You will support each other as you all trade old habits for healthier new ones.
- Working as a group. You don't have to figure this out alone.
- The new energy and confidence that comes with losing weight and reducing your risk for diabetes.
- The flexibility of beginning the program when it's convenient for you. Classes begin with no fewer than 8 participants and no more than 15 participants. If there is space in a newly formed class, you can join up to the 4th session.

This interactive course is designed to be engaging, whether participants choose to participate in-person or virtually.

IMPROVE YOUR HEALTH, BOOST YOUR ENERGY

To help reduce your risk for diabetes, your goal in the YMCA's Diabetes Prevention Program is to reduce your body weight by 7% and increase your physical activity by at least 150 minutes per week within the first half of the program.

For example, if you weigh 200 pounds your goal for the first half of the program would be to lose 14 pounds and increase your physical activity to what could be a brisk 30-minute walk, five days per week.

DO YOU QUALIFY?

To participate in the program, you must be:

- 18 years or older,
- Overweight (BMI ≥ 25)*, and
- Diagnosed with prediabetes via one of three blood tests or a previous diagnosis of gestational diabetes.**

If you don't have a blood test result, you must have a qualifying risk score.

SANFORD-SPRINGVALE YMCA complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex.

[Please go to <http://www.hhs.gov/civil-rights-for-individuals/section-1557/translated-resources/index.html> to select the two taglines needed for your community and insert into this space.]

WHAT IS PREDIABETES?

Prediabetes occurs when blood sugar levels are higher than normal but not high enough for a type 2 diabetes diagnosis. Risk for developing type 2 diabetes may be reduced or eliminated by weight loss, healthier eating and increased physical activity.

IF YOU SCORED 5 OR HIGHER

You are at increased risk for having prediabetes and are at high risk for type 2 diabetes. However, only your doctor can tell for sure if you have type 2 diabetes or prediabetes, a condition in which blood

sugar levels are higher than normal but not high enough yet to be diagnosed as type 2 diabetes. Talk to your doctor to see if additional testing is needed. If you are African American, Hispanic/Latino American, American Indian/Alaska Native, Asian American, or Pacific Islander, you are at higher risk for prediabetes and type 2 diabetes. Also, if you are Asian American, you are at increased risk for type 2 diabetes at a lower weight (about 15 pounds lower than weights in the 1 Point column). Talk to your doctor to see if you should have your blood sugar tested.

PREDIABETES RISK TEST

- How old are you?
 Younger than 40 years (0 points)
 40–49 years (1 point)
 50–59 years (2 points)
 60 years or older (3 points)
- Are you a man or a woman?
 Man (1 point) Woman (0 points)
- If you are a woman, have you ever been diagnosed with gestational diabetes?
 Yes (1 point) No (0 points)
- Do you have a mother, father, sister, or brother with diabetes?
 Yes (1 point) No (0 points)
- Have you ever been diagnosed with high blood pressure?
 Yes (1 point) No (0 points)
- Are you physically active?
 Yes (0 points) No (1 point)
- What is your weight category?
 (See chart at right)
